

CRWQ-72B

7,000 lumens, WQXGA, single-chip DLP projector

What's more, the CRWQ-72B replaces complex setups with multiple displays to get a high-resolution display in your meeting room, collaboration room or visualization room.

High-contrast images

The CRWQ-72B projector combines a unique WQXGA (2,560 x 1,600) resolution - much higher than any other single-chip DLP projector - with a light output of 7,000 lumens. The projector enables showing more data on screen simultaneously which has a documented effect on work efficiency, because more pixels equal more information that can be shown.* As it provides stable and high-contrast images that allow you to concentrate better and offers a low noise level, you can turn your meeting room into an efficient collaboration room.

Flexible installation

Next to having the smallest installation footprint, the CRWQ-72B is also the lightest projector in the 6,500 to 10,000 lumens segment. Thanks to its range of all-glass and high-quality lenses with wide lens shift, it offers ultimate installation flexibility.

Built to last

The CRWQ-72B features a filter-free design and reliable DLP® technology for unmatched picture accuracy and low total cost of ownership. Designed for unlimited use, it also comes with a three-year warranty, for true peace of mind.
